

12th Street Force Main Replacement Tampa, FL

PROJECT OVERVIEW AND CHALLENGES

Bradshaw Construction was part in a Tampa Design/Build project. This project consisted of 3 separate drives mined by microtunneling. The first drive consisted of 477 linear feet for 60 inch steel casing to accommodate a 48 inch force main. The second was 450 linear feet and the third at a length of 1,290 linear feet for 60 inch steel casing for a 42 inch force main. These drives were for utility crossings at the Hillsborough River, Martin Luther King Boulevard / Ida Street, and also Hillsborough Avenue. The soil conditions were soft and below the water table.
